

**Network Publications Introduces the
SMART FOLDER for Real Estate Agents.**

Network Publications realtor folders will include a QR (Quick Response) barcode that enables a direct link from your folder to your website using a smart phone. Real Estate agents will never have to go back to their offices to get more information or additional listings to show their clients. Have buyers access your website remotely. All information contained on your website is now immediately available with one click of a Smart Phone. The codes we create are unique to the office, group or individual agent that we produce the folder.

The Network Publications SMART FOLDER is advertiser sponsored. They are created for the Realtor at NO cost, which is underwritten by the advertising.

Download application from Beetagg.com and click on this QR code. You will be directed to www.NetworkPublicationsUS.com where you can learn more about our program.
